*Terms—Cash with order, or satisfactory reference.*

**GUARANTEE**—All stock sent out guaranteed to be true to name and in good growing condition. If any should prove otherwise, please notify me and I will gladly replace the stock or refund your money.

# WILBRINK

**a very early forcer**

**H**S early as Halley, and a beautiful light pink color, with creamy-yellow blotch on lower petals. Blooms in 60 to 70 days from planting at carnation temperature. (Gladioli do well planted between carnations.)

I have ready for immediate shipment an exceptionally fine stock of young, healthy, vigorous, high crown bulbs, which I have cured especially for forcing by gentle heat.

**A picture of my well developed, high crown Bulbs  
Full-of-Pep and already to grow.**

**T**HESE bulbs were raised from young, healthy, vigorous stock, which has never been allowed to bloom, and developed by intensive cultivation, over a long growing season, on fertile upland, without irrigation or commercial fertilizer, and dug about the middle of November, after the stalks were ripened by frost, and then carefully cured by gentle heat, which insures bulbs of the very best quality for either forcing or outside culture.

*When through using this list, I would appreciate the favor if you would kindly give it to some grower who may be interested in Gladioli bulbs.*

*Yours truly,*

**N. A. MILLER.**
